Introduction

Brand Outline

Browse AI is a promising technology company which uses the advanced Artificial Intelligence to help our users with their everyday work life. With us, you can create any website into API in two minutes, extract the data without writing a single line of code and access many other time saving technologies.

How we started?

People need more data to be able to grow, but even though there is plenty of valuable live data on the web, collecting them is incredibly expensive and time-consuming. We wanted a change. So we rolled up our sleeves in 2020 and got started with building the first missing piece: an easy, affordable, and reliable way to extract data from the web at scale.

Our Missions

To democratize access to information on the internet.

Our objectives

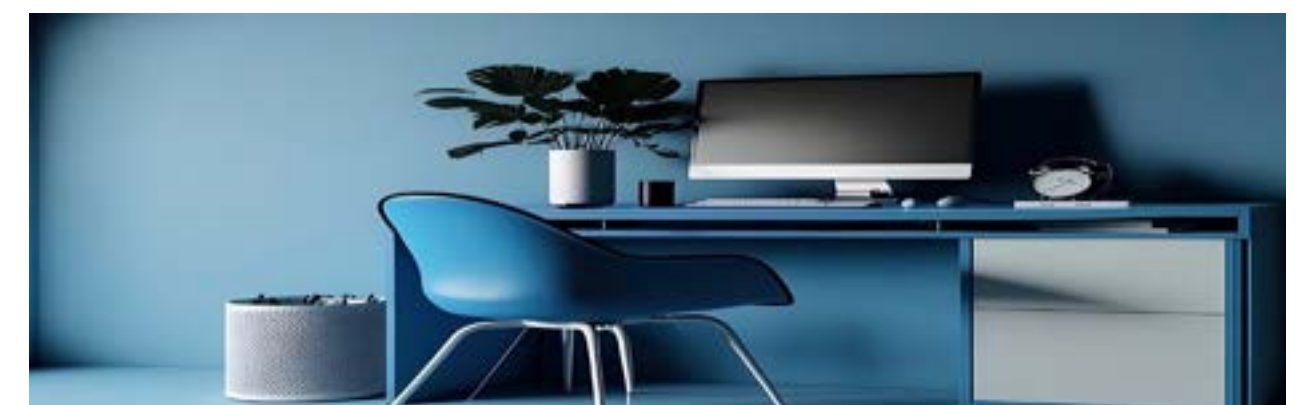

Optimize for Happiness: We use software to make people happier. This is only possible if we genuinely care about our users and partners.

The Simplest Alternative:

We create value by making it simpler.

Data-driven Decision-making: Every high-impact decision we make must be backed by data

Brand Identity

Ideation

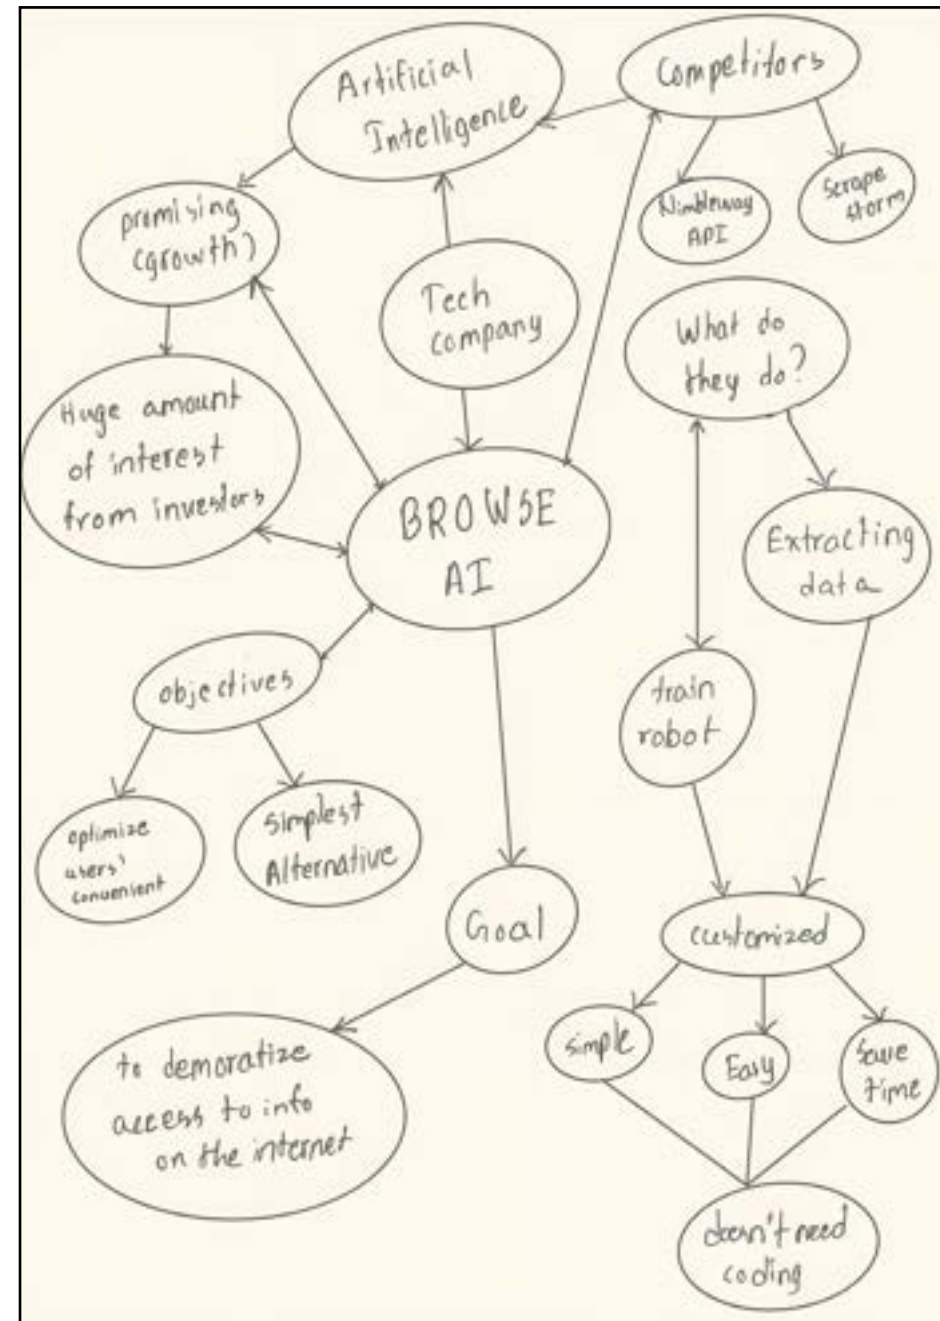

Mind Map

We initiated the ideation process by the word “Browse AI” which is simply the company’s name. Then, we linked it to all of our expectations, goals, strengths, and weaknesses.

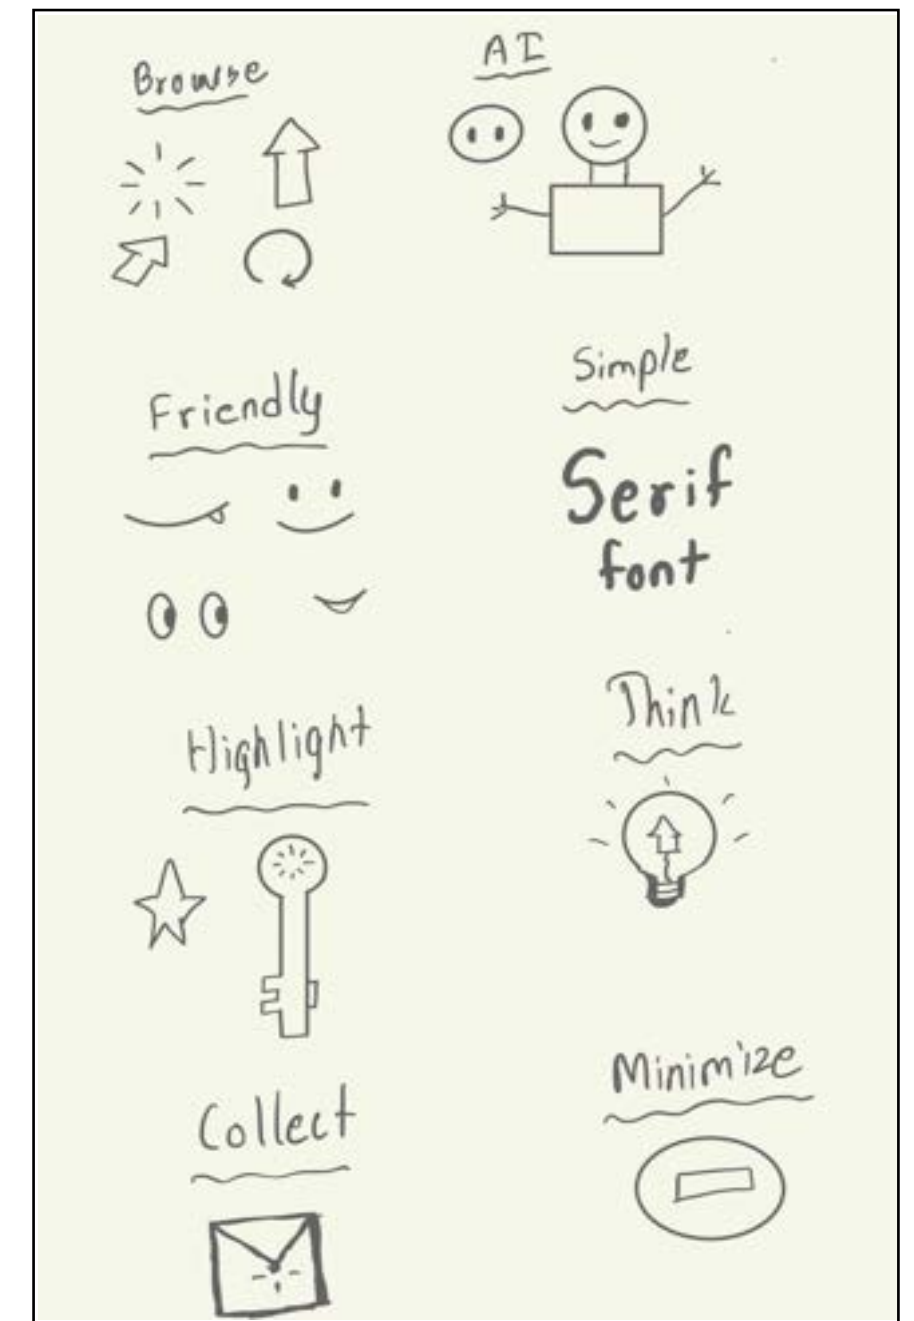

Action Verbs

Based on our brand’s mission, goals and objectives, we generated many different words. Subsequently, we opted to utilize a symbol which represents the essence of the word “browse”.

Mind Map

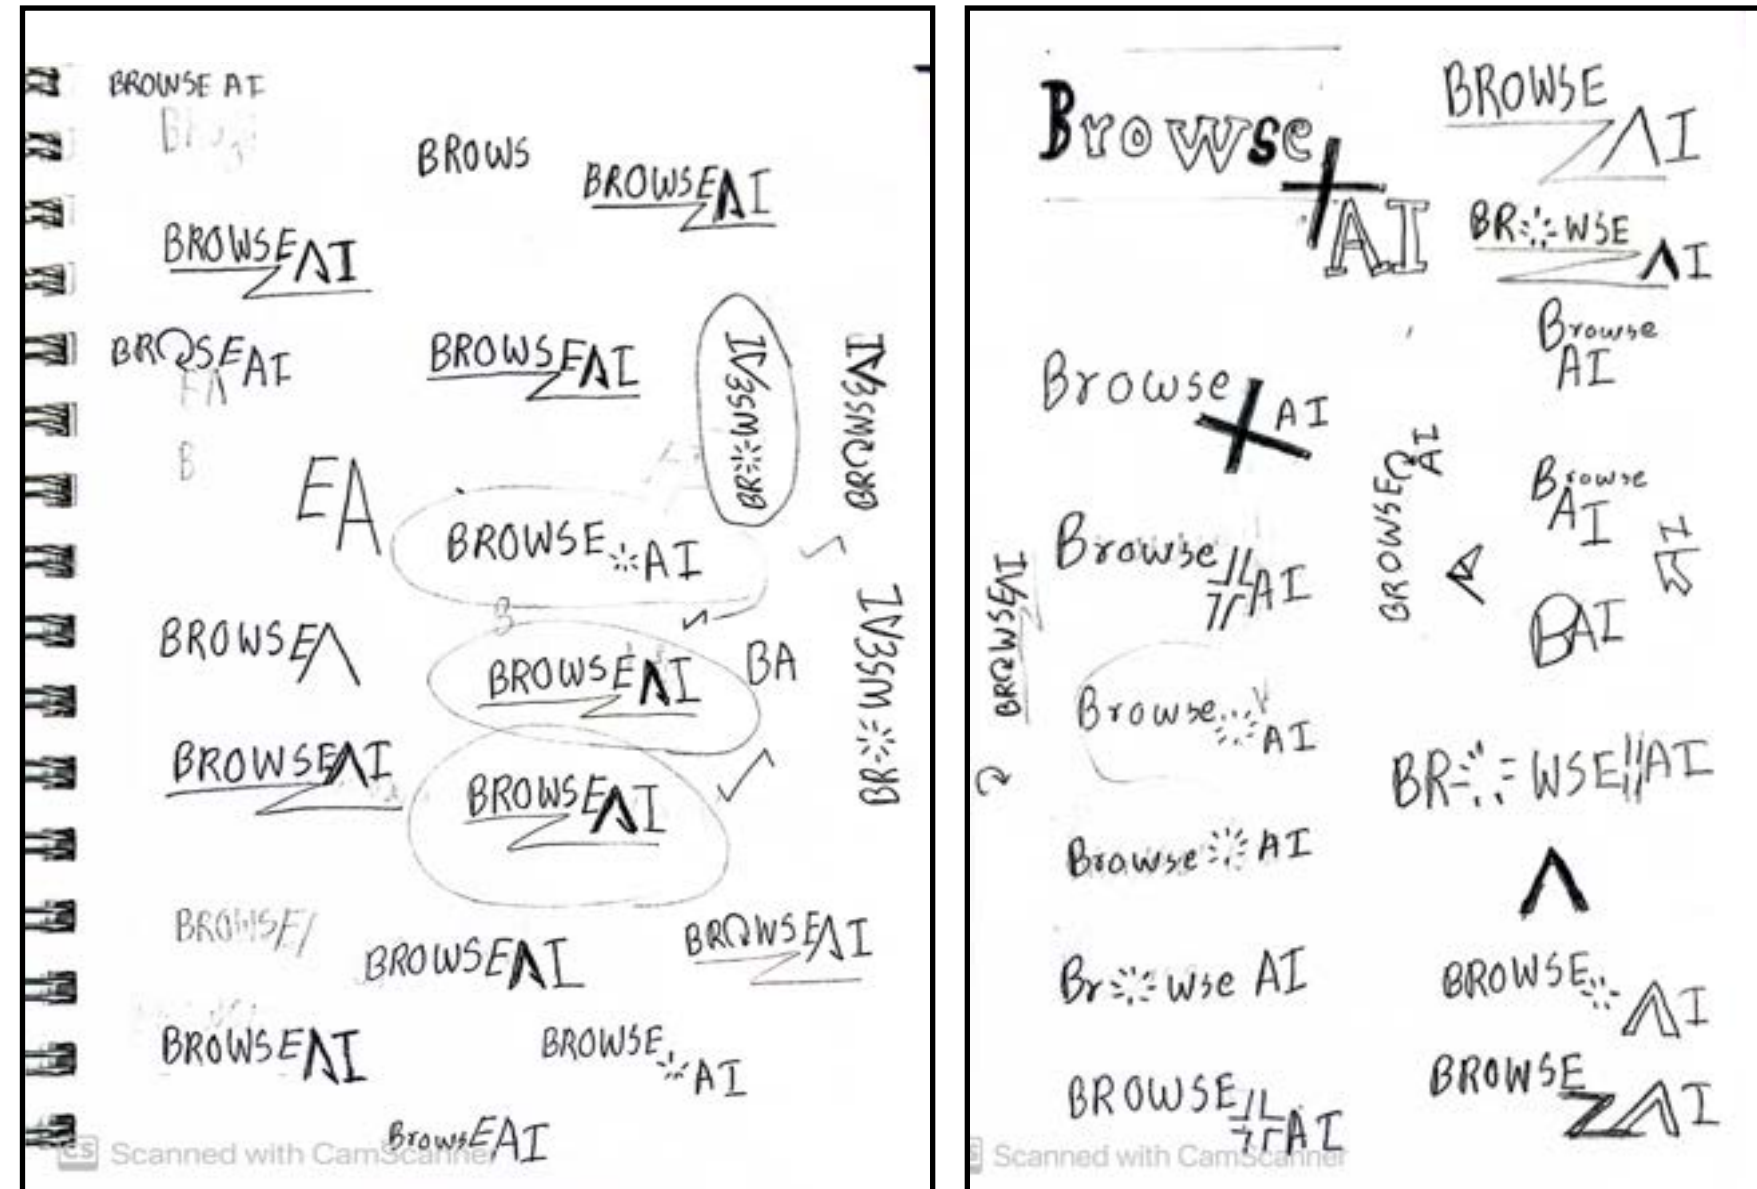

Action Verbs

The initial step in developing our brand identity involves the ideation process. It enhanced the quality of design elements by outlining every aspect of the company,

Sketches

Hand drawn sketches play a vital role in ideation process. Thus, before going to digital drawing step, we sketched out the possible logotypes that we could create. These messy hand drawn sketches were the very useful and effective initial step to brainstorm our needs and wants. Our main goal was to replace one of the alphabets with a symbol or an icon. To be unique and bold, most of the sketches were tried in capital letters.

Digital Sketches

BROWSE
AI

Following the ideation process, we opted to replace the standard alphabet 'O' with a refresh icon, resembling an arrow. To make it look unique and align with the rest of the alphabets, we settled with downward arrow instead of using the exact arrow in refresh icon.

Final Logotype

Below is our primary logotype which provides the sense of trust, security and simplicity. To highlight our efficient AI system, we created the word 'AI' bigger than the word 'browse'. Italizing the word 'browse' represents the uniqueness and keeping both words as capital letters, we manifest to keep it clean and bold.

***BROWSE*AI**

Usage Guidelines

Minimum size (max reduction) of the logtype we allow is 50px or average of 13.2mm in height and 192px or 50.8mm in width .
Must not be smaller than this measurement.

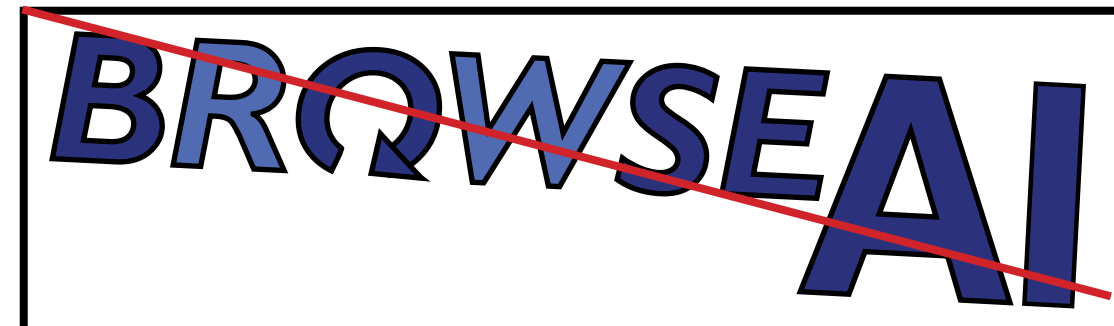

Incorrect usages

Do not rotate the logotype either up or down, positive or negative degrees of rotation is not allowed. Always keep it at 180 degree. Do not put any stroke on the logotype. Keep it clean and use the correct color palette as mentioned in colour palette page.

Don't!

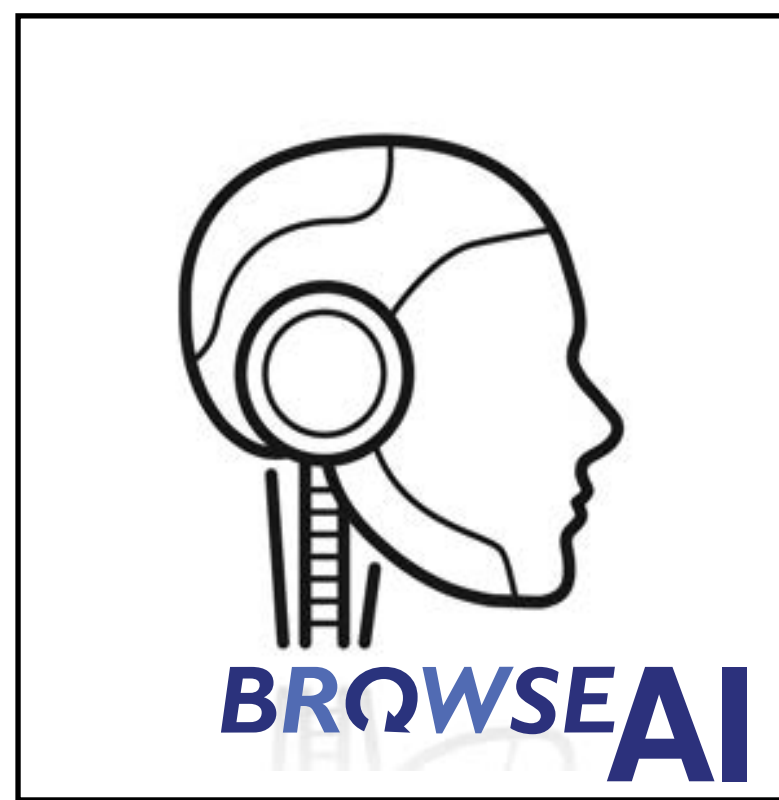

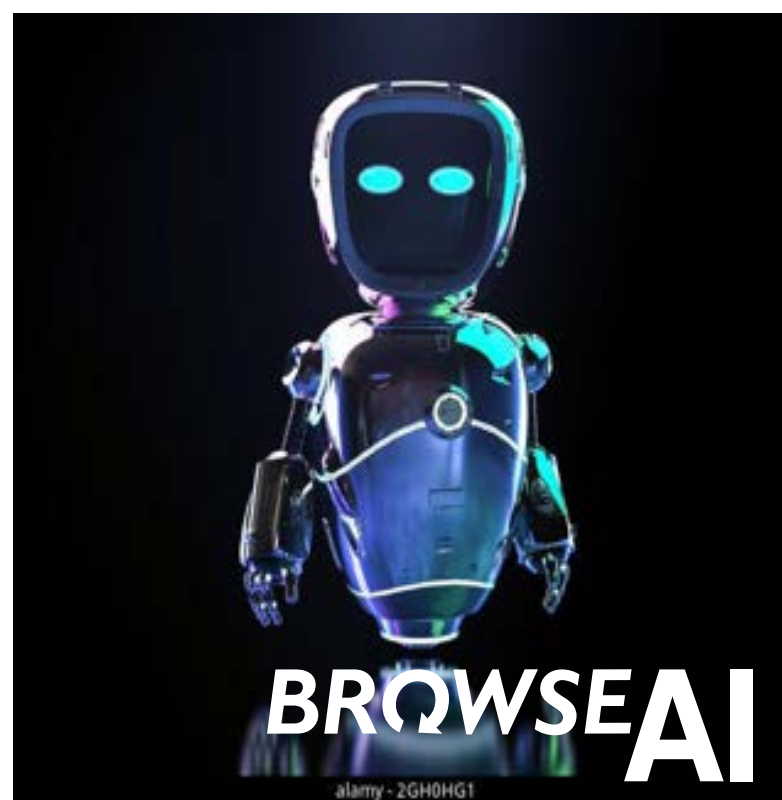

Don't!

Don't!

Variations

These logotype variations maybe used when the background colour does not match with the logotype. For white background, light shades background and images, the primary colours applied in the original logotype must be used. Except from the company's letterhead, white colour logotype must be used on darker shades backgrounds for better readability.

Color Palette

Primary Colours

HEX: #2c327b
RGB: 44, 50, 123
CMYK: 236, 64, 48

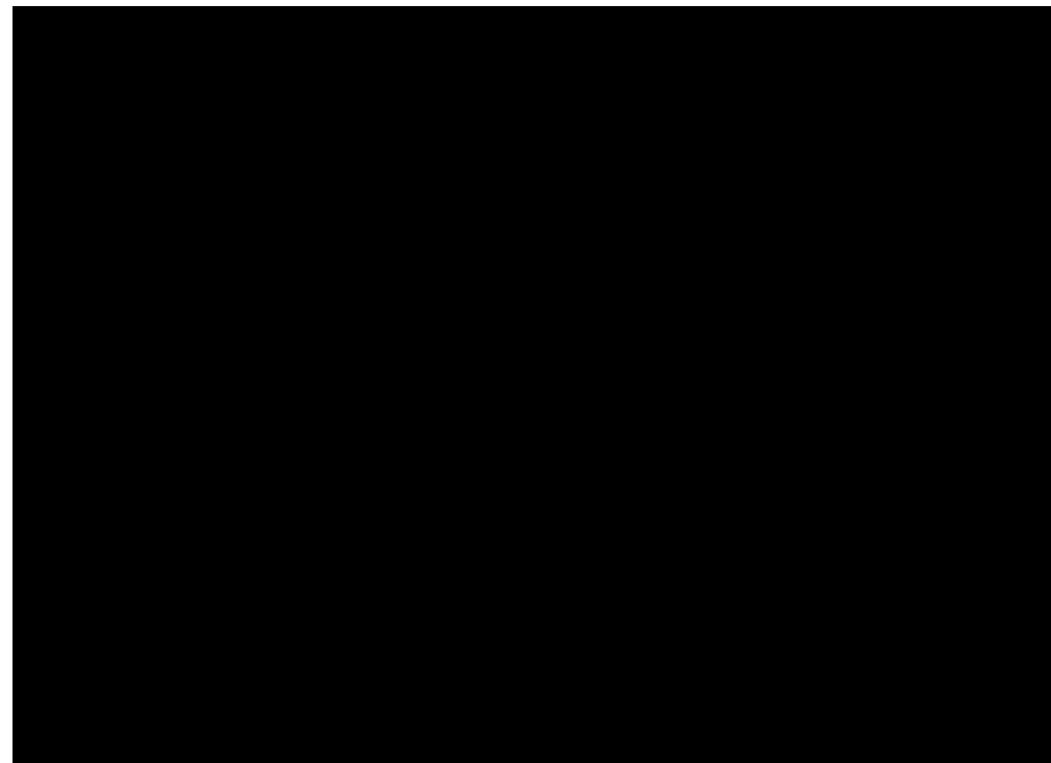

HEX: #516cb3
RGB: 81, 108, 179
CMYK: 75, 60, 0, 0

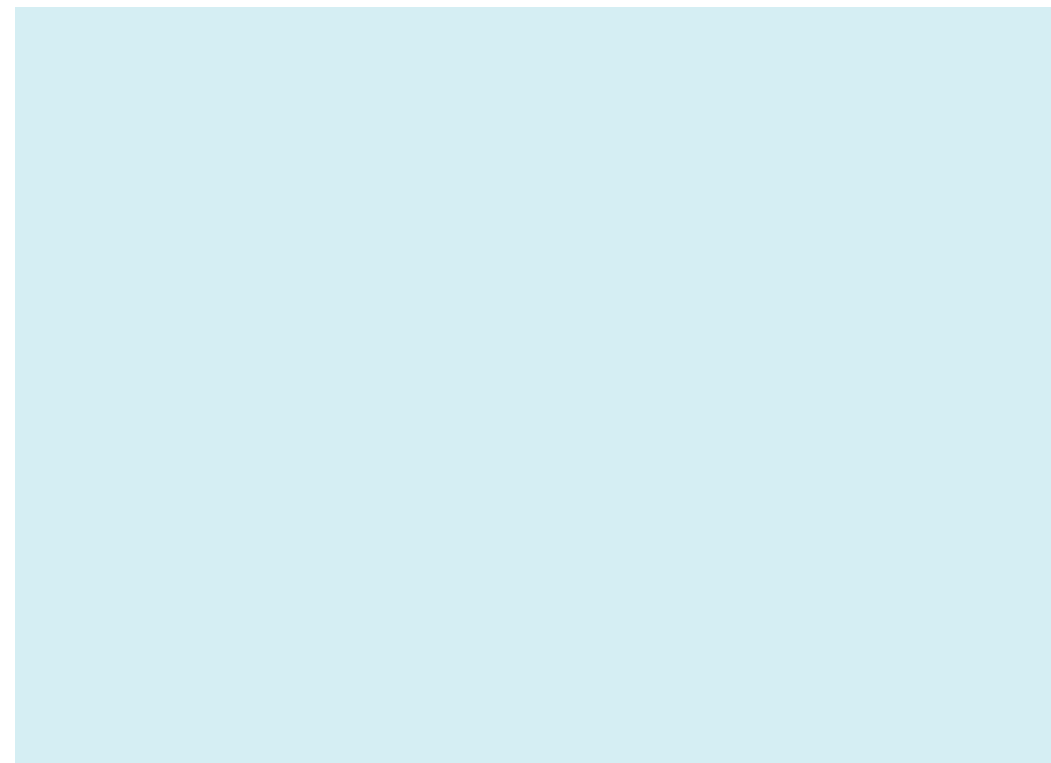

Darker blue provides the authority and intelligence. Lighter blue express the feeling of clean, trust and calmness. By combining both colours, our logotype aim to get the user's trust and interest.

Color Palette

Secondary Colours

HEX: #000000
RGB: 44, 50, 123
CMYK: 236, 64, 48

HEX: #D5EEF4
RGB: 44, 50, 123
CMYK: 236, 64, 48

HEX: #FFFFFF
RGB: 44, 50, 123
CMYK: 236, 64, 48

These secondary colours may be used for background, text and images. As mentioned in the logotype variations, white color logotype also can be used with darker shades background.

Typography

Primary typefaces

Gill Sans MT Bold

Logotype

One of our primary typefaces Gill Sans MT Bold typeface must be applied in our logotype. This typeface portrays the modernized style but also bold and clean which suits perfectly with our aim.

Calibri

Lorem

Another primary typeface Calibri can be used for headings, sub-headings and texts. Hence, you may use various styles of Calibri such as regular, bold, italic, and light.

Secondary typefaces

Arial

Lorem

Arial typeface is our secondary typeface which is aimed to use in headings and some texts.
